

SAVING COSTS WITH DIRECT ENGAGEMENT COMPLIANCE

How a Medacs Healthcare client saved £1 million by increasing Direct Engagement efficiency.

BACKGROUND

To save costs and reduce potential compliance risks, a Healthcare Trust urgently needed to change the way some of their existing doctors and allied health professionals were paid. Workers needed to be retained so there would be no impact on services, but also needed to change their preferred method of working via third party umbrella companies and be 'directly engaged' to allow the trust to realise additional VAT savings.

OUR SOLUTION

Medacs Healthcare supported the Trust to ensure all their workers were engaged directly with a comprehensive project plan, implemented within just eight weeks. All potential impacts on operations were successfully mitigated with tight project management and a detailed risk register, and the project was shortlisted for an award.
