

TRANSFORMING WORKFORCES WITH MANAGED STAFF BANKS

How a Litmus client saved £2.7 million through a new Staff Bank.

BACKGROUND

A Healthcare Trust needed to establish a new medical staff bank and was keen to participate in a new Flexible Bank Pilot programme, run by the Department of Health. Being a recruitment partner to the Trust for over 20 years, Litmus was chosen to support the Trust with this project.

OUR SOLUTION

Litmus worked closely with the Trust to secure their participation in the programme, and quickly launched a new medical Staff Bank in less than 8 weeks. A dedicated onsite Staff Bank team was formed to implement the new technology and processes, which included a new mobile-app based booking system allowing staff to easily view and book shifts. The project was subsequently shortlisted for two prominent healthcare industry awards.
