

# SAVING COSTS THROUGH STATEMENT OF WORK

How Lorien helped a client save costs through Statement of Work (SoW).

## BACKGROUND

A multinational automotive business required assistance with implementing a SoW solution to save costs, and gain visibility and control outside of its internal teams. The SoW solutions would outline the work of 20 experts for high priority projects, freeing up resources for the business to focus on other core activities.

## OUR SOLUTION

With many years of experience delivering SoW within the tech, digital and transformation sectors, Lorien implemented 2 SoW solutions to outline and manage the work delivered by 20 people on behalf of the client. To ensure a continuous and clear feedback loop, quarterly reviews on key milestones are conducted, providing transparent tracking on all activity.

# 2 solutions

2 SoW solutions were implemented for the client.

# 20 experts

20 experts managed.

Continuous quarterly reviews conducted.
