

SOURCING SKILL SETS IN SHORT SUPPLY

How Carbon60 helped a client find highly skilled & technical people for temporary projects.

BACKGROUND

A company within the lighting solutions engineering sector required assistance with sourcing temporary talent with the right skill sets to work on various construction projects. Recruitment for these niche skills can be time consuming and costly, and the company needed a specialist recruitment partner who understands the technical aspects of the engineering sector to source these candidates quickly and cost-effectively.

OUR SOLUTION

As specialists in engineering and other STEM sectors, Carbon60 helped this client source the highly skilled talent that it needed by advertising the roles on the Carbon60 website and relevant industry job boards, reaching out to Carbon60's extensive candidate database and screening all applications. The client also regularly engages Carbon60 to provide market intelligence on candidate availability & market rates.
