

PROVIDING ADDITIONAL STAFFING COVER TO ENSURE BUSINESS CONTINUITY

How Medacs Healthcare helped a client prevent staff shortages over winter.

BACKGROUND

A Healthcare Trust recognised that they needed to secure the equivalent of 26 full time nurses on a temporary basis to help safeguard clinical services during the winter months. In previous winters, the Trust experienced staff shortages and wanted to avoid this as much as possible.

OUR SOLUTION

As a recruitment partner to this client since 2014, Medacs Healthcare implemented a plan in the Autumn months for an Additional Capacity Project that ensured a sufficient and regular supply of temporary nurses for the upcoming winter months.

90%

weekly fill rate
maintained

“Medacs Healthcare significantly relieved our staffing challenges, providing additional nurses and HCAs, managing onboarding and achieving excellent fill rates.”
